SAMPLE OUTPUT

Task 1: RSA key generation

Step 1:- Generate an RSA private key

Command:-
openssl genpkey -algorithm RSA -out ********** -pkeyopt rsa_keygen_bits:****

theia@theia-manishkr:/home/project$ cat **********

Output:-

-----BEGIN PRIVATE KEY-----

(k9□Ŧ□)□□□□9theia@theia-manishkr:/home/project$

Step 2: Verify the digital signature

Command: openssl dgst -sha256 -verify ********** -signature ********** **********

Output:
openssl dgst -sha256 -verify ********** -signature ********** **********
Verified OK
theia@theia-manishkr:/home/project$

Task 5: Diffie-Hellman key exchange

Step 1: Generate DH parameters

Command: openssl dhparam -out ********** ****

Step 2: Generate Alice's private key

Command: openssl genpkey -paramfile ********** -out **********

Step 3: Generate Alice's public key

Command: openssl pkey -in ********** -pubout -out **********

Step 4: Generate Bob's private key

Command: openssl genpkey -paramfile ********** -out **********

Step 5: Generate Bob's public key

Command: openssl pkey -in ********** -pubout -out **********

Step 6: Compute the shared secret for Alice.

Command: openssl pkeyutl -derive -inkey ********** -peerkey ********** -out **********

Step 7: Compute the shared secret for Bob

Command:- openssl pkeyutl -derive -inkey ********** -peerkey ********** -out **********

Step 8: Verify the shared secret keys

Command:- cmp ********** **********

Task 6: Public Key Infrastructure (PKI) setup

Step 1: Generate the root private key

Command: openssl genrsa -out ********** ****

Step 2: Create the root certificate

Command: openssl req -x509 -new -key ********** -out ********** -days ****

Step 3: Generate a CSR for the server

Command: openssl req -new -key ********** -out **********

Output:

theia@theia-manishkr:/home/project$ cat ********** **********

Command: openssl req -new -key ********** -out **********
Output

theia@theia-manishkr:/home/project$ openssl req -new -key ********** -out
****
You are about to be asked to enter information that will be incorporated
into your certificate request.
What you are about to enter is what is called a Distinguished Name or a DN.
There are quite a few fields but you can leave some blank
For some fields there will be a default value,
If you enter '.', the field will be left blank.

Country Name (2 letter code) [AU]:IN
State or Province Name (full name) [Some-State]:Karnataka
Locality Name (eg, city) []:Bangalore
Organization Name (eg, company) [Internet Widgits Pty Ltd]:ABC
Organizational Unit Name (eg, section) []:CS
Common Name (e.g. server FQDN or YOUR name) []:XYZ
Email Address []:xyz@abc.com

Please enter the following 'extra' attributes
to be sent with your certificate request
A challenge password []:12345
An optional company name []:
